Index of Subjects

Age, at calving, milk yield and composition, 45, 135

Bacteria, milk, preparation of reference flora, 89
Benzyl mercaptan, cream, steam distillation, vapour/liquid equilibrium coefficients, 147, 229
Buttermaking, cream processing and hardness of butter, 269
reworking of butter and moisture distribution, 263

Calving, age, milk yield and composition, 45, 135
Casein, labelling, ^{131}I, 181
rennin, action of, 193
β-Casein, labelling, ^{131}I, 181
κ-Casein, rennin, action of, 57, 193
sialic acid fraction, 57
Cattle, *see also* **Friesian cattle**
in hot environment (review), 291
salmonella infection (review), 97
Cheddar cheese, seaminess, nature and cause, 35
streptomyces content, 27
Cheese, staphylococci content, 187
Colostrum, composition, cows, 249
Concentrates, supplement to silage, 219
with flaked maize, 1
Cream, 'landcress' taint, removal by steam distillation, 147, 229

Digestibility, ground hay, flaked maize, 1
Disease, *see* **Salmonella infection**
Dried milk, fatty acid composition, 19
tocopherols as antioxidants, 143

Environment, hot, effect on cattle (review), 291
Euglobulin, labelling, ^{131}I, 181

Fatty acids, milk fat, drying process, 19
identification of 3,7,11,15-tetramethylhexadecanoic acid, 21
Feeding, ground hay, flaked maize, 1
silage, grass, differing maturity, 219
Flavour, 'landcress' taint, cream, 147, 229
Friesian cattle, milk yield, liveweight and age at calving, 135
Frozen storage, starters, viability, 151

Glycopeptide, from sialic acid fraction, κ-casein, 57
Grass, maturity for silage, 219
Growth rate, heifers, feeding, ground hay, flaked maize, 1

Hay, ground, growth rate, milk yield and composition, 1
supplement to silage, 219
Heat treatment, *see also* **Pasteurization**
milk, deposits, analysis, UHT plant, 203
factors affecting, 65
staphylococci content, cheese, 187
vitamin content, 13

Iodine^{131}, labelling of milk proteins, 181

Keeping quality, dried milk, antioxidants, 143

Lactation, stage and number, milk yield and composition, 45
β-Lactoglobulin, content, milk, variants, 209
labelling, ^{131}I, 181
Lactose, content, milk, factors affecting, 45, 237, 249, 255
Leucocytes, number, milk, staphylococci ingestion, 157, 163, 171
Liveweight, at calving, milk yield, 135

Maize, flaked, growth rate, milk yield and composition, 1
Milk, osmotic pressure relationship, blood, 79
raw and heat-treated, staphylococci content, 187
reference flora, preparation of, 89
vitamin content, after heat treatment, 13
Milk composition, feeding, ground hay, flaked maize, 1
silage, grass, differing maturity, 219
in hot environment (review), 291
incomplete milking or extended milking interval, 237
milking throughout pregnancy, 249
oxytocin injections, effect of, 255
stage and number of lactation, 45
Milk deposits, on heat treatment, UHT, analysis, 203
factors affecting, 65
Milk fat, content, milk, factors affecting, 1, 45, 219, 237, 249
fatty acids, drying process, 19
identification of 3,7,11,15-tetramethylhexadecanoic acid, 21
Milk powder, *see* **Dried milk**
Milk proteins, content, milk, factors affecting, 45, 237, 249, 255
labelling, ^{131}I, 181
Milk yield, feeding, ground hay, flaked maize, 1
silage, grass, differing maturity, 219
in hot environment (review), 291
incomplete milking or extended milking interval, 237
liveweight and age at calving, 135
milking throughout pregnancy, 249
stage and number of lactation, 45
Milking, incomplete, or extended milking interval, milk yield and composition, 237
throughout pregnancy, milk yield and composition, 249

Minerals, content, milk, factors affecting, 45, 237, 249, 255

Osmotic pressure, relationship, milk and blood, 79
Oxytocin, injections, milk composition, 255

Pasteurization, *see also* **Heat treatment**
laboratory-scale HTST milk pasteurizer, 281
Physiology, cattle in hot environment, 291

Rennin, casein, action on, 193
κ-casein, action on, 57

Salmonella infection (review), 97
Sialic acid, fraction, κ-casein, 57
Silage, grass, maturity, milk yield and composition, 219
Solids-not-fat, content, milk, factors affecting, 1, 45, 219, 249
Staphylococci, content, milk, cheese, 187
Staphylococcus aureus, infusion into teat-cistern, -duct, udder reaction, 157, 163, 171
Starters, frozen storage, viability, 151
Sterilization, UHT, milk, vitamin content, 13
Streptococci, lactic, frozen storage, viability, 151
Streptomyces albus, content, Cheddar cheese, 27

Thiamine, content, milk, after heat treatment, 13
Tocopherols, as antioxidants, dried milk, 143

Udder, osmotic pressure relationship, milk and blood, 79
reaction to infusion of staphylococci, teat-cistern, -duct, 157, 163, 171
secretory ability and permeability, incomplete milking, 237

Vitamin B_1, *see* **Thiamine**
Vitamin B_6, content, milk, after heat treatment, 13
Vitamin B_{12}, content, milk, after heat treatment, 13
